

PERSONAL PROFILE

As a Software/Cloud/DevOps engineer with a passion for innovation and a commitment to quality, I thrive in dynamic, fast-paced environments where I can leverage my multidisciplinary skill set to drive impactful solutions. With a strong background in Linux management, Kubernetes administration, and cloud technologies, I have developed expertise in building and managing robust CI/CD pipelines for software delivery, as well as standing up and maintaining Kubernetes clusters. I am also well-versed in object storage, relational and NoSQL databases, and infrastructure as code, and am committed to staying current with emerging technologies. In addition, I am passionate about pursuing the learning process with artificial intelligence, and plan to build upon my Computer Software Engineering background in this field. I am dedicated to continuously expanding my knowledge of both current and future technologies and tools. As a collaborative team player with strong communication and problem-solving skills, I am committed to delivering solutions that meet the diverse and complex needs of stakeholders. Additionally, I possess excellent soft skills, including adaptability, creativity, and leadership, that enable me to effectively manage ambiguity and drive positive outcomes for all stakeholders involved.
